
finding out what was filed

Posted by laurie - 2012/01/04 23:32

Is there a way to find out which or what tax return someone filed or is involved in? For example, in a divorce where there is a belief that one spouse is not disclosing assets to the other spouse, can a party make a request to the IRS to discover what the other person filed or what businesses the other person is involved with?
