
car accident

Posted by dyrak - 2008/03/28 18:55

CA,

My friend had unfortunately met a car accident lately.

I would like to confer with you guys if what should be done, it was an enigma really.

Facts: After the startling occurrence he immediately leave the scene. Eventually, he was caught after which he admitted fault.

He waited for several hours following the customary procedures.

Then he was ask to sign some papers. It was later found out that the said papers was from the other driver's insurance company. I think the content showed a release from liability.

appreciated

Your question really is not clear to me. Where was he held, at the police station or post? And if so, how did the insurance company get to him there? How did they even know where to find him to get him to sign a potential release?

Re:car accident

A concern friend you are.

Ideally, after a car accident, whether your are at fault or not, you should not admit fault.

Though you are vulnerable for just about anything including admitting liability, you should avoid making admissions.

What you must do is to confer with a personal injury lawyer, for all you know it may be shown that you were not actually at fault.

The improper admission may work against your claim later on.

Leaving the scene is a bad move.

The signature may have an effect, but may still be contested.

Confer with an attorney at the soonest...

Ease up..

The relayed facts from your friend may lack some info.

Whatever events that transpire, here are some relevant info.

Foremost, seek the help of car accident lawyer in your area so that your legal claims are assessed sooner.

The big "Don'ts" following a car accident:

- Do not admit fault.
- Do not make any admissions
- Do not leave the scene of the crime
- Do nor subscribe to any document without first contacting your lawyer

The foregoing could make or break your claim.

Actually, I had advised him that much, as I could. But it seems that facts unclear.
Thank you guys.

Yah, i agree with all of your illumination. Real facts are somewhat wanting, I have was asking for the real account of events but it seems that my friend is not so conscious about it.
Anyways thank you all guys.

Normally, nobody does the accident deliberately. It happens so coincidentally or accidentally, but we just can't flee out of

the overall incident. We have to give compensation or accomplish certain laws and regulation of road accident. Whatever the accident whether Truck Accident, car accident or any sorts of accident there is law firm ready to analyze circumstances.

In reality, subsequent to a car accident, even if your are the culprit and / or in no way, you can not say responsibility. However, you are actually sensitive and vulnerable for just about things among them admitting accountability, you'll want to keep clear of getting admissions.

Whatever you have to do is almost always to confer with an accident lawyers, for everybody you're certain it will be suggested for which you are not genuinely the culprit.

Typically the unconventional entry might possibly give good results vs a promise soon after.

Going out of typically the market can be described as unhealthy progress.

Typically the personal unsecured might possibly make a splash, and yet might possibly definitely be competitive.
